This course is an historical and thematic introduction to the major artistic monuments of world civilizations prior to 1400 C.E. It is designed for students who seek an introduction to the history and the analysis of art as well as for those who desire a foundation for more specialized study in the field. The course begins with the earliest recorded artistic monuments and continues through the High Middle Ages in Europe ending around 1400 A.D. The class attempts a global approach to the presentation of the material, organized around social complexity and cultural evolution.

The class is structured as lectures during which the major monuments are presented, illustrated through 35 mm. slide projection. The lectures and readings are augmented thematically in smaller weekly sections lead by Teaching Assistants. Registration for this course is through sections only. Please be sure that you have registered for an appropriate section, otherwise you will not be registered for the course. Attendance in your scheduled section is mandatory and failure to attend will have a significant effect on your grade. Sections will be held weekly at their appointed hours Monday through Friday in their assigned university space except when they are held at the University of Pennyslvania Museum or the Philadelphia Museum of Art. The first week of sections begins with Monday, September 10th, 2001
